

Removal of Toenails

Thanks to the latest findings, you have now two options:

The conventional method

painful, bloody and protracted

**Injections
for pain**

**Aggressive,
forcible
removal of
toenails**

**Bloody,
long-lasting
pain,
medication
required**

**Repeated
painful
dressing
changes**

The BILO method

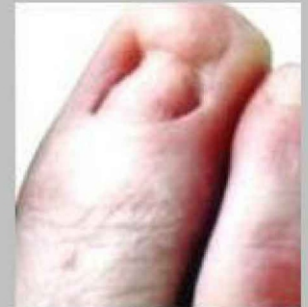

no pain, no blood, no surgery

**Simple case
done in
30 minutes**

In any case:

- No blood
- No cut
- No pain
- No drugs
- No bed rest

**More
complicated
case with
all 10 nails
done in
4 hours**

Short description of the BILO method:

The nails are removed layer by layer and due to high sophisticated equipment and top training, it is possible to remove a nail without damaging the skin between the nail and the toe.

No surgery * No blood * No pain * No drugs
